

Inverlea Park Tree Planting Goals

- Restore original biodiversity
- Removal of invasive species
- Favouring historically accurate species
- Preservation of local gene pool where possible
- Removal of incongruous new planting
- Involving local community in planning stage and aftercare
- Public education through interpretive panels (both social and natural history)
- Respectful of current uses
- Actions to care for the trees (fencing)
- Attempt to collect seed from historic trees in Inverlea Park for future planting
- Harmonious blend of human use and ecological stability
- Water quality education
- Using the known champions already living in the neighbourhood
