

The County of Peterborough
Waste Management Committee

To: Chair and Members of Committee
From: Laurie Westaway, Manager of Environmental Services
Date: November 15, 2010

**Subject: Report WMC10-009
REM – Wesleyville gas**

**Recommendation: That Report WMC10-009 from the Manager of
Environmental Services, presenting an update on the
REM Wesleyville project, be received for information.**

Financial Impact: None

Update:

At the September 20, 2010 WMC meeting report WMC10-006 was provided for information. Staff was directed to monitor the activities of the Wesleyville project and attend the future public meeting. Particular concern was raised about the project falling under the Green Energy Act.

The purpose of this report is to provide Committee with an update on the REM-Wesleyville project.

This project falls within the parameters of the Environmental Assessment Act and all its requirements. Even though energy will be generated from the facility, it does not classify as a Green Energy Act project. This project is more comparable to the Landfill Gas Project at the Peterborough Waste Management Facility.

Currently, the project is 70% through the Environmental Assessment Process. The Certificate of Approval process will start in November and the last public consultation is planned for December or January. It is expect that the project will be completed by spring 2011.

Respectfully submitted,

Laurie Westaway, Manager of Environmental Services
