

NOVELBRANCH

Intelligent Mini-Library

NovelBranch is a secure cabinet equipped with RFID-enabled shelves from which library patrons can easily check material out and return.

NovelBranch

Extend your community reach with NovelBranch - a mini-library. NovelBranch will help you reach under-serviced areas in your community, extending your presence to people who may not otherwise be able to visit a library branch but who do frequent other community spaces. Your reach could extend to nursing homes, daycare facilities, career centres, your local hospital. All a user needs is a library card. All you need is a network cable and power outlet.

Its transparent door is equipped with an electronic lock that is opened with the presentation of a library card. Once the door is closed, a receipt is printed with the list of material taken out of NovelBranch and their due date. Returning is super easy too: present the card, open the door, place materials back on the shelf. An intuitive user interface will help guide the patron.

NovelBranch communicates to your ILS through SIP2 and uses RFID technology. The software has a full featured staff mode from which you can run inventory reports.

Specifications

- 125 books, 5 shelves
- 12" screen
- 80 mm thermal printer
- 100-240V input voltage
- 503 D X 1351 W X 1920 H mm
- RFID: ISO15693, 18000-3-1
- RFID data models: ISO28560, Danish
- Patron card: barcode, Mifare
- Pin code entry: touchscreen
- Network Connectivity: TCP/IP
- ILS Connectivity: SIP, SIP2
