

The Public Open House for the Downtown Core section of Charlotte Street's streetscape plan is scheduled on the same night as the APRAC meeting - September 19. The Open House will take place from 4:00 - 8:00 in the Sutherland Room. Urban Park plans will also be on display for information.

Perhaps some APRAC members would like to drop in before the APRAC meeting to see what is being proposed for Charlotte Street.

By then, the Urban Park plan should be approved by Council.

Over the summer, I received direction to pursue a public-private partnership for the construction of a building on King Street, which will also contain the building space in support of the park. The construction of the park is being fast tracked - that is why haste is being taken to get it approved so we can begin construction very soon after the last day of the Downtown Farmer's Market this year.
